Mount Kilimanjaro, the Serengeti Plains, tropical beaches, coral reefs, and such wildlife as elephants, lions, giraffes, zebras, and rhinos. With all this, Kenya and northern Tanzania are the ultimate destination for safaris, adventure travel, and ecotourism. I bought "Birds of Kenya and Northern Tanzania" and "Birds of East Africa" (which focuses on the same region) in anticipation of an upcoming trip. Both books are much larger and heavier than I expected, especially for the price, but that just reflects the wealth of knowledge and page after page of color plates.

About Birds of Kenya and Northern Tanzania. This field guide is an abridged edition of the very successful Birds of Kenya and Northern Tanzania written by the same authors. It covers all bird species known from the region, including vagrants.

No doubt these boundaries were dictated largely by commercial concerns, but they make biogeographical sense as well, apart from the intrusion of the Usambara Mountains, with its eastern arc forest birds. The avifaunas of northern Tanzania and southern Kenya have a great deal in common. Perhaps footbook would be a better term for this size of a text.
